

# CARERS UK

## the voice of carers

Carers UK is the voice of carers. Six million carers provide unpaid care by looking after ill, frail or disabled family members, friends or partners.

Carers give so much to society yet experience ill health, poverty and discrimination. Carers UK was set up by carers to end this injustice.

We will not stop until people recognise the true value of carers' contribution to society, and carers get the practical, financial and emotional support they need.

To improve carers lives we:

- put our members at the heart of Carers UK, relying on their valuable feedback on all carers concerns, to help inform and direct the work we do
- provide advice and guidance to carers about their rights and how to get support
- run annual events including Carers Rights Day and Carers Week to help raise awareness
- campaign for changes from policy makers, employers and service providers that make a real difference to carers lives
- transform the understanding of caring so that carers do not suffer discrimination and are valued
